

**Перечень публикаций научно-педагогических работников в изданиях,
индексируемых в базах данных WoS или Scopus (за 2017 год)**

1. Korshunov M.M., V.A. Shestakov, Yu.N. Togushova Comparison of experimental data on the spin resonance frequency and gap magnitudes in Fe-based superconductors // *Journal of Magnetism and Magnetic Materials*. 2017. V.440. P.133–135.
2. Tegai S.Ph., Drobov I.V. Averaging Schwarzschild spacetime // *Phys. Rev. D*.2017.-V. 96.-P. 024041.
3. Kolovsky A.R., Shepelyansky D.L. Dynamical thermalization in isolated quantum dots and black holes // *Europhys. Lett*. 2017. V.117. P.10003 (7 pages).
4. Kolovsky A.R. Bogoliubov depletion of the fragmented condensate in the bosonic // *Phys. Rev. A*. 2017. V.95. P. 033622 (8 pages).
5. Kolovsky A.R. Microscopic models of source and sink for atomtronics // *Phys. Rev. A*. 2017. V. 96. P. 011601(R) (4 pages).
6. Medvedeva M.A., Prudnikov P.V., Elin A.S. Non-equilibrium critical behavior of thin Ising film // *Journal of Magnetism and Magnetic Materials*. 2017. V. 440. P. 33-36. DOI: 10.1016/j.jmmm.2016.12.094
7. Pankin P.S., Vetrov S.Y., Timofeev I. V. Tunable hybrid Tamm-microcavity states // *J. Opt. Soc. Am. B*. 2017. V.34. № 12. P. 2633. DOI: 10.1364/JOSAB.34.002633
8. Timofeev I. V, Pankin P.S., Vetrov S.Y., Arkhipkin V.G., Lee W., Zyryanov V.Y. Chiral Optical Tamm States: Temporal Coupled-Mode Theory // *Crystals*. 2017. V. 7. № 4. P. 113. DOI: 10.3390/cryst7040113
9. Bikbaev R.G., Vetrov S.Y., Timofeev I. V. Optical Tamm states at the interface between a photonic crystal and a gyroid layer // *J. Opt. Soc. Am. B*. 2017. V. 34. № 10. P. 2198. DOI: 10.1364/JOSAB.34.002198
10. Vyunishchev A.M., Pankin P.S., Svyakhovskiy S.E., Timofeev I. V, Vetrov S.Y. Quasiperiodic one-dimensional photonic crystals with adjustable multiple photonic band gaps // *Opt. Lett*. 2017. DOI: 10.1364/OL.42.003602
11. Pyatnov M. V, Vetrov S.Y., Timofeev I. V. Localized optical modes in a defect-containing liquid-crystal structure adjacent to the metal // *J. Opt. Soc. Am. B*. 2017. V. 34. № 9. P. 2011. DOI: 10.1364/JOSAB.34.002011
12. Vetrov S.Y., Bikbaev R.G., Rudakova N. V, Chen K.-P., Timofeev I. V. Optical Tamm states at the interface between a photonic crystal and an epsilon-near-zero nanocomposite // *J. Opt. (United Kingdom)*. 2017. V. 19. № 8. P. 85103. DOI: 10.1088/2040-8986/aa75fb
13. Vetrov S.Y., Pankin P.S., Timofeev I. V. Coupled optical Tamm states at edges of a photonic crystal enclosed by a composite of core-shell nanoparticles // *Phys. Wave Phenom*. 2017. V. 25. № 3. P. 170–174. DOI: 10.3103/S1541308X17030025
14. Bikbaev R.G., Vetrov S.Y., Timofeev I. V. The optical Tamm states at the interface between a photonic crystal and nanoporous silver // *J. Opt. (United Kingdom)*. 2017. V. 19. № 1. P. 15104. DOI: 10.1088/2040-8986/19/1/015104
15. Pyatnov M. V, Vetrov S.Y., Timofeev I. V. Localised optical states in a structure formed by two oppositely handed cholesteric liquid crystal layers and a metal // *Liq. Cryst*. 2017. V. 44. № 4. P. 674–678. DOI: 10.1080/02678292.2016.1229055
16. Vetrov S.Y., Bikbaev R.G., Timofeev I. V. The optical Tamm states at the edges of a photonic crystal bounded by one or two layers of a strongly anisotropic nanocomposite // *Opt. Commun*. 2017. V. 395. Pp. 275–281. DOI: 10.1016/j.optcom.2016.08.075
17. Kudashkin K., Nikolaev S, Ovchinnikov S. Spectral Properties of the Bose-Hubbard Model Within the Cluster Perturbation Theory in X-Operators Representation // *Journal of Superconductivity and Novel Magnetism*, 2017, V.30, issue 1, pp.103-107. DOI: 10.1007/s10948-016-3781-y
18. Hua-Shu Hsu, Yu-Ying Chang, Yi-Ying Chin, Hong-Ji Lin, Chien-Te Chen, Shih-Jye Sun, Sergey M. Zharkov, Chun-Rong Lin, Sergey G. Ovchinnikov. Exchange bias in graphitic C/Co composites //

Carbon, 2017, Vol.114, pp.642-648. DOI: 10.1016/j.carbon.2016.12.060. IF- 6.198

19. Nesterov A.I., Orlov Yu.S., Nikolaev S.V., Ovchinnikov S.G. Cooperative Phenomena in Spin Crossover Systems // *Physical Review B* 96, 134103 (2017). DOI: 10.1103/PhysRevB.96.134103
20. Orlov Yu.S., Dudnikov V.A., Polaron Model of Pseudogap State in Quasi-One-Dimensional Systems // *Journal of Experimental and Theoretical Physics* 152, 944 (2017). DOI: 10.1134/S1063776117110103
21. Fedorov, A.S., Kuzubov, A.A., Visotin, M.A., Tomilin, F.N. New method for calculations of nanostructure kinetic stability at high temperature // *Journal of Magnetism and Magnetic Materials*. 2017. V. 440, pp. 167-170
22. Kuzubov A.A., Kovaleva E.A., Popova M.I., (...), Visotin M.A., Fedorov A.S. DFT investigation of electronic structures and magnetic properties of halides family MeHal_3 ($\text{Me}=\text{Ti, Mo, Zr, Nb, Ru}$, $\text{Hal}=\text{Cl, Br, I}$) one dimensional structures // *Journal of Magnetism and Magnetic Materials*. 2017. V. 440. V. 93-96
23. Fedorov A.S., Visotin M.A., Kholobina A.S., (...), Mikhaleva N.S., Hsu H.S. Investigation of intrinsic defect magnetic properties in wurtzite ZnO materials // *Journal of Magnetism and Magnetic Materials*. 2017. V. 440. Pp. 5-9
24. Tarasov I.A., Visotin M.A., Aleksandrovsky A.S., (...), Varnakov S.N., Ovchinnikov S.G. Si/Fe flux ratio influence on growth and physical properties of polycrystalline $\beta\text{-FeSi}_2$ thin films on Si(100) surface // *Journal of Magnetism and Magnetic Materials*. 2017. V. 440. Pp. 144-152.
25. Орлов Ю.С., Николаев С.В., Нестеров А.И., Овчинников С.Г. Магнитные и структурные фазовые переходы в системах со спиновым кроссовером под давлением // *Письма в ЖЭТФ*. 2017. Том 105, вып.12. С. 732-736.
26. Орлов Ю.С., Дудников В.А., Платунов М.С., Горев М.В., Великанов Д.А., Казак Н.В., Гаврилкин С.Ю., Соловьёв Л.А., Велигжанин А.А., Верещагин С.Н., Овчинников С.Г. Низкотемпературные аномалии Шоттки и магнитное состояние р-электронов кислорода в замещенных кобальтатах $\text{Gd}_{0.4}\text{Sr}_{0.6}\text{CoO}_{3-\delta}$ // *ЖЭТФ*. 2018. V. 153, p. 259. DOI: 10.7868/S0044451018020086
27. Князев Ю.В., Казак Н.В., Баюков О.А., Платунов М.С., Великанов Д.А., Безматерных Л.Н., Иванова Н.Б., Овчинников С.Г. Магнитные свойства монокристаллов $\text{Co}_2+2\text{Co}_{1-x}\text{Fe}_x\text{VO}_5$ ($x=0.10$) со структурой людвигита // *Журн. эксперим. и теор. физ.* 2017. Т.151. Вып.4. С. 730-735. DOI: 10.7868/S0044451017040125
28. Пятнов М.В., Ветров С.Я., Тимофеев И.В. Оптические локализованные состояния в жидкокристаллической структуре, граничащей с металлом // *Оптика и спектроскопия*. 2017. Т. 123. № 2. С. 177–180. DOI: 10.7868/S0030403417080207
